

**NEW  
PRODUCT**

## PRODUCT ADVANTAGES

- Vertical and Horizontal applications
- Surpasses NEC 2011 test requirements for improved hinge strength and impact performance
- No cord exits to cut or break away
- Preassembled wasp guards
- Snap in adapter plates included for GFCI, duplex, and single receptacles
- Key-hole, or box mounting
- Lockable cover

## MATERIALS

- Polycarbonate
- Neoprene gasket
- Plastic inserts

## TECHNICAL SPECS

- UL listed
- US patent # 6,133,531

# PLASTIC WHILE IN USE COVER

Sigma's new line of Non-Metallic While In Use Covers (WIUC) is engineered to handle the abuses of everyday outdoor electrical use. The robust design is constructed from heavy duty, UV resistant polycarbonate and surpasses NEC's 2011 test requirements for improved hinge strength and impact performance. The product offering includes one and two gang models which easily adapt for the most common outlet configurations. Preassembled hinges, gaskets and cord exits makes these the fastest and simplest cover assemblies on the market. These products are ideal for residential and commercial applications which require long lasting, durable protection at an affordable price.

**Two Gang**

**Single Gang**

Can be mounted horizontally or vertically

**GFCI Insert**

**Duplex Insert**

**Round Insert**
